

MARSHALL ANNOUNCES PRESTIGIOUS ORDER FOR HEAVY DUTY LATHE

Marshall Machines Limited is happy to announce a significant order for a machine required to do extremely heavy duty turning. The customer is an old user of Marshall and has given this important project to the company due to the rigidity and material removal requirements of the component.

Mr. Gaurav Sarup, Managing Director of Marshall Machines Limited stated, “Marshall has been known for building the heaviest and the most Rigid machines in India. We are extremely popular with customers who are looking to machine difficult and heavy components. We do not face much competition in this segment of business and our Machines speak for themselves with the value they deliver.”

Marshall has earlier delivered this kind of solutions to various sectors like Oil and Gas, Windmills, Automotive etc. The complete design and techniques used for machine building like hand scraping and fine matching are key to deliver successful solutions. Some of the satisfied users include Bharat Forge, RSB Transmissions, MM Forgings and GNA Axles.

The company will look to further venture in the field of Heavy duty cutting and try to replace the imported machine market by offering locally produced at par machines.

About Marshall Machines Limited

Marshall is a leader in smart, automated, robotic CNC Machines and Industry 4.0 technologies. The company is driven by R&D and Intellectual Property with several Patents in India and USA.
