
MARSHALL ANNOUNCES ENHANCEMENTS TO TECHNOLOGY ACQUISITION FOR SUPERIOR INDUSTRY COMPATIBILITY

Marshall Machines Limited, a leader in advanced manufacturing solutions, is excited to announce the extension of our timeline for integrating cutting-edge technology into our operations. This period of enhancement ensures that the new technology will be impeccably aligned with the specific needs of the industry, especially in terms of automation capabilities and the machining of challenging materials such as Inconel and titanium which have become the specific requirement of customers across the country.

In the relentless pursuit of excellence, the company taken the strategic decision to refine the acquired technology further and asked our Valued Suppliers to assist us in this endeavour. These modifications are crucial to guaranteeing that our technology not only meets but exceeds industry standards. The company has engaged services of specialists to promote and develop business arising from the acquisition of this technology, these specialists have given concrete feedback based on interaction with the end users that these changes and enhancements will play a key role in deployment of the technology in the market. The enhancements will equip our machines with superior automation capabilities and the robustness required to handle difficult-to-machine materials, thus setting new benchmarks in the manufacturing sector.

“Our commitment to providing the best-in-class solutions is unwavering,” said Mr. Gaurav Sarup, Managing Director of Marshall Machines Limited. “By investing this time to enhance this technology, we ensure that our clients will receive equipment that is not only state-of-the-art but also perfectly

tailored to their most demanding requirements. These enhancements will significantly elevate the capabilities of our existing machines and the new Models we plan to launch this year.”

The modification process to enhance the capabilities is well underway and is scheduled for completion by October this year. While this modified timeline also means that the business will be developed post this completion, but the company strongly feels this was an essential step for the success of this new project. This strategic move underscores the company’s dedication to innovation and quality, as it strives to deliver unparalleled performance and reliability in its products both existing and new.

We appreciate the continued support and patience of our valued clients and stakeholders as we finalize these essential enhancements. The result will be technology that propels the industry forward, enabling manufacturers to achieve new heights of efficiency and precision. This will significantly boost new business and also help the company focus on products which deliver higher EBITDA Margin since they will primarily be import substitutes.

Marshall Machines Limited remains committed to leading the way in manufacturing innovation. We look forward to unveiling the enhanced technology later this year, confident that it will provide our clients with the advanced capabilities they need to excel in today’s competitive market.

About Marshall Machines Limited

Marshall is a leader in smart, automated, robotic CNC Machines and Industry 4.0 technologies. The company is driven by R&D and Intellectual Property with several Patents in India and USA. Our customers include leading OEMS from various sectors including Auto, Auto Ancillaries, Consumer Durables, Engineering, Electronics, Steel, etc. Emerging sectors include Aerospace, Medical Equipment, etc.
